Expertise in Cables

A new Milestone. A new Benchmark.

Established in Germany in 1975, under the passionate leadership of founder *Hans M. Strassner*, HMS Elektronik has become synonymous with technology-driven, quality audio products. Known for its engineering expertise, HMS has built a dedicated following of audiophiles who value precision and performance.

HMS product developments have always been based on strict physical principles. Minimal losses and maximum protection from interference are the most important characteristics in the brand's product philosophy and guarantee unadulterated sound with maximum dynamics. This has resulted in highly acclaimed cable series like the Gran Finale Jubilee and Suprema, with outstanding sonic results. Even the more affordable lines benefit from the same scientific principles to give optimal performance in line with their price range.

HMS further specialized in delivering the cleanest possible power to your system through the Energia power filters, using their Ground Loop Suppression (GLS) and Direct Current Suppression (DCS) technologies and advanced combinations of materials like ferrite to filter power supply to your system. This set the reputation of HMS Elektronik in Germany and beyond as **The Specialist in Cables and Line Filter Technology.**

Since 2024, HMS Elektronik is part of **International Audio Holding B.V.**, parent company of renowned audio technology brands **Siltech** and **Crystal Cable**. Production of all HMS products is now done in the state-of-the-art facilities in the Netherlands, where modern production techniques and decades of experience with cable making, metallurgies and fundamental research are added to enhance the HMS products further. All with the same research-driven philosophy to preserve the identity of the brand and carry forward the legacy of HMS for the next 50 years and further.

With German precision engineering, enhanced by Dutch craftsmanship and innovation, and a relentless pursuit of sonic purity, HMS products connect you to your music as nature intended — pure, dynamic, and uncolored. As we celebrate our 50th anniversary, we introduce a refined and expanded range of cables that reflect our lifelong dedication to perfection. From the accessible to the supreme, HMS cables are crafted to deliver nothing short of audio truth.

Simplicity, made Exceptional

The Foundations cables offer the essential values of HMS — neutrality, clarity, and durability — making high-end audio accessible to every music lover. All cables in the Foundations range are the ideal entrance to the HMS brand and can form the foundation of your system with their purpose-designed cable constructions. All Foundations cables are also available in bulk for custom installations.

- **Energia SL Power Cable:** Effortless power delivery with EMI-cancelling cable construction without shielding for ultimate openness in smaller setups.
- **Duetto MKIII Interconnects:** Delivers smooth, balanced sound and low noise floor with easy integration across all system types. Available in RCA and XLR versions.
- **AI Cinema Speaker Cables:** Created for home cinema systems and two-channel setups, while crafted with audiophile attention.

HMS Foundations bring reference-worthy performance to everyday listening environments.

		Conductor	Insulation	Shields	Type
FOUNDATIONS	Energia SL Power Cable	OFC Cu	Polyolefin + TPU	no	9x multistrand
	Duetto MKIII Interconnect	OFC Cu	Teflon + Foamed FEP	Cu Braided	1x twisted pair (single core)
	AI Cinema Speaker cable	OFC Cu	Teflon	no	6x Multistrand + center filler

Elegant Balance of Musicality and Precision

Positioned perfectly for music lovers stepping deeper into audiophile territory, Concertato cables are designed to elevate your system without compromising musical warmth or detail. Offers a wide range of speaker cables, analog interconnects and digital cables.

- Carefully engineered for lower inductance and enhanced signal integrity
- Refined conductor geometry and shielding
- Natural tonality with superb control of transient response

Concertato is the bridge between accessible performance and high-end refinement.

		Conductor	Insulation	Shields	Type
CONCERTATO	Interconnect XLR /RCA	OFC Cu	Teflon + Foamed FEP	Cu Braided	1x twisted pair (single core)
	Phono	OFC Cu	Teflon + Foamed FEP	Cu Braided	2x twisted pair (single core)
	Speaker cable	OFC Cu	Teflon + TPU	no	14x multistrand
	Digit 75 Ohm	OFC Cu	Teflon + Foamed FEP	Cu Braided	1x twisted pair (single core)
	Digit 110 Ohm	OFC Cu	Teflon + Foamed FEP	Cu Braided	1x twisted pair (single core)
	Network	OFC Cu	High density polymer	Aluminium foil & -braided shield	4x twisted pair

Carbon Shielding for Superior Purity

Armonia has been well-known and awarded in Germany for its high end feeling and performance, with ferrite-enhanced designs for shielding against all kinds of interference. Following that same philosophy, Armonia Carbon replaces the ferrite material with carbon-infused shielding, offering optimized filtering of RFI and EMI and static dissipation of noise. Designed for advanced systems, Armonia Carbon features cutting-edge materials for outstanding signal purity.

- Carbon fiber infused shielding
- Ultra-precise conductor geometry
- Deeper bass, transparent midrange, and extended highs

Experience outstanding signal purity and detail with Armonia Carbon.

		Conductor	Insulation	Shields	Type
ARMONIA CARBON	Power cable	OFC Cu	Polyolefin + TPU	Carbon	9x multistrand
	Interconnect XLR/RCA	OFC Cu	Teflon + Foamed FEP + Polyolefin	SPC Braided + Carbon	6x Multistrand + center filler
	Phono	OFC Cu	Teflon + Foamed FEP + Polyolefin	SPC Braided + Carbon	2x Interconnect RCA
	Speaker cable	OFC Cu	Teflon	Carbon	14x multistrand

Ultimate Expression of Audio Purity

The HMS Gran Finale was launched during the mid-1990s and featured the first version of Mr. Strassner’s signature ‘TOP-Match’ technology, and was later succeeded by the ‘MKII’ and ‘Jubilee’ versions. In honor of HMS’s 50th Anniversary, Gran Finale 50 embodies the pinnacle of our cable making expertise, combining the heritage of HMS technologies and air-insulation mechanisms with new materials like Monocrystal Copper for the speaker cables and analog interconnects, and carbon-infused shielding in most of the range.

- Proprietary conductor technology for exceptional low-loss signal transfer
- Multi-layer shieldings and insulation techniques ensuring a dead-silent background
- Designed for ultra high-end systems demanding absolute fidelity

Gran Finale 50 – created for the most demanding connoisseurs.

		Conductor	Insulation	Shields	Type
GRAN FINALE 50	Power cable	OFC Cu	Polyolefin + TPU	Carbon	26x Multistrand
	Interconnect XLR/RCA	Monocrystal Cu	PTFE Tubes + Teflon + air	Carbon	3x Single Core
	Phono	Monocrystal Cu	PTFE Tubes	Carbon	4x Single Core
	Speaker cable	Monocrystal Cu	Teflon + PTFE Insulation	no	8x Single Core
	Digit RCA/BNC 75 Ohm	OFC Cu	Teflon + Foamed PTFE + Polyolefin	SPC Braided	6x Multistrand + center filler
	Digit XLR 110 Ohm	OFC Cu	Teflon + Foamed PTFE + Polyolefin	SPC Braided	6x Multistrand + center filler
	Network	OFC Cu	High density polymer	Aluminium foil per twisted pair + aluminium shield + Carbon	4x twisted pair
	USB	OFC Cu	High density polymer	Aluminium foil per twisted pair + aluminium shield + Carbon	4x twisted pair

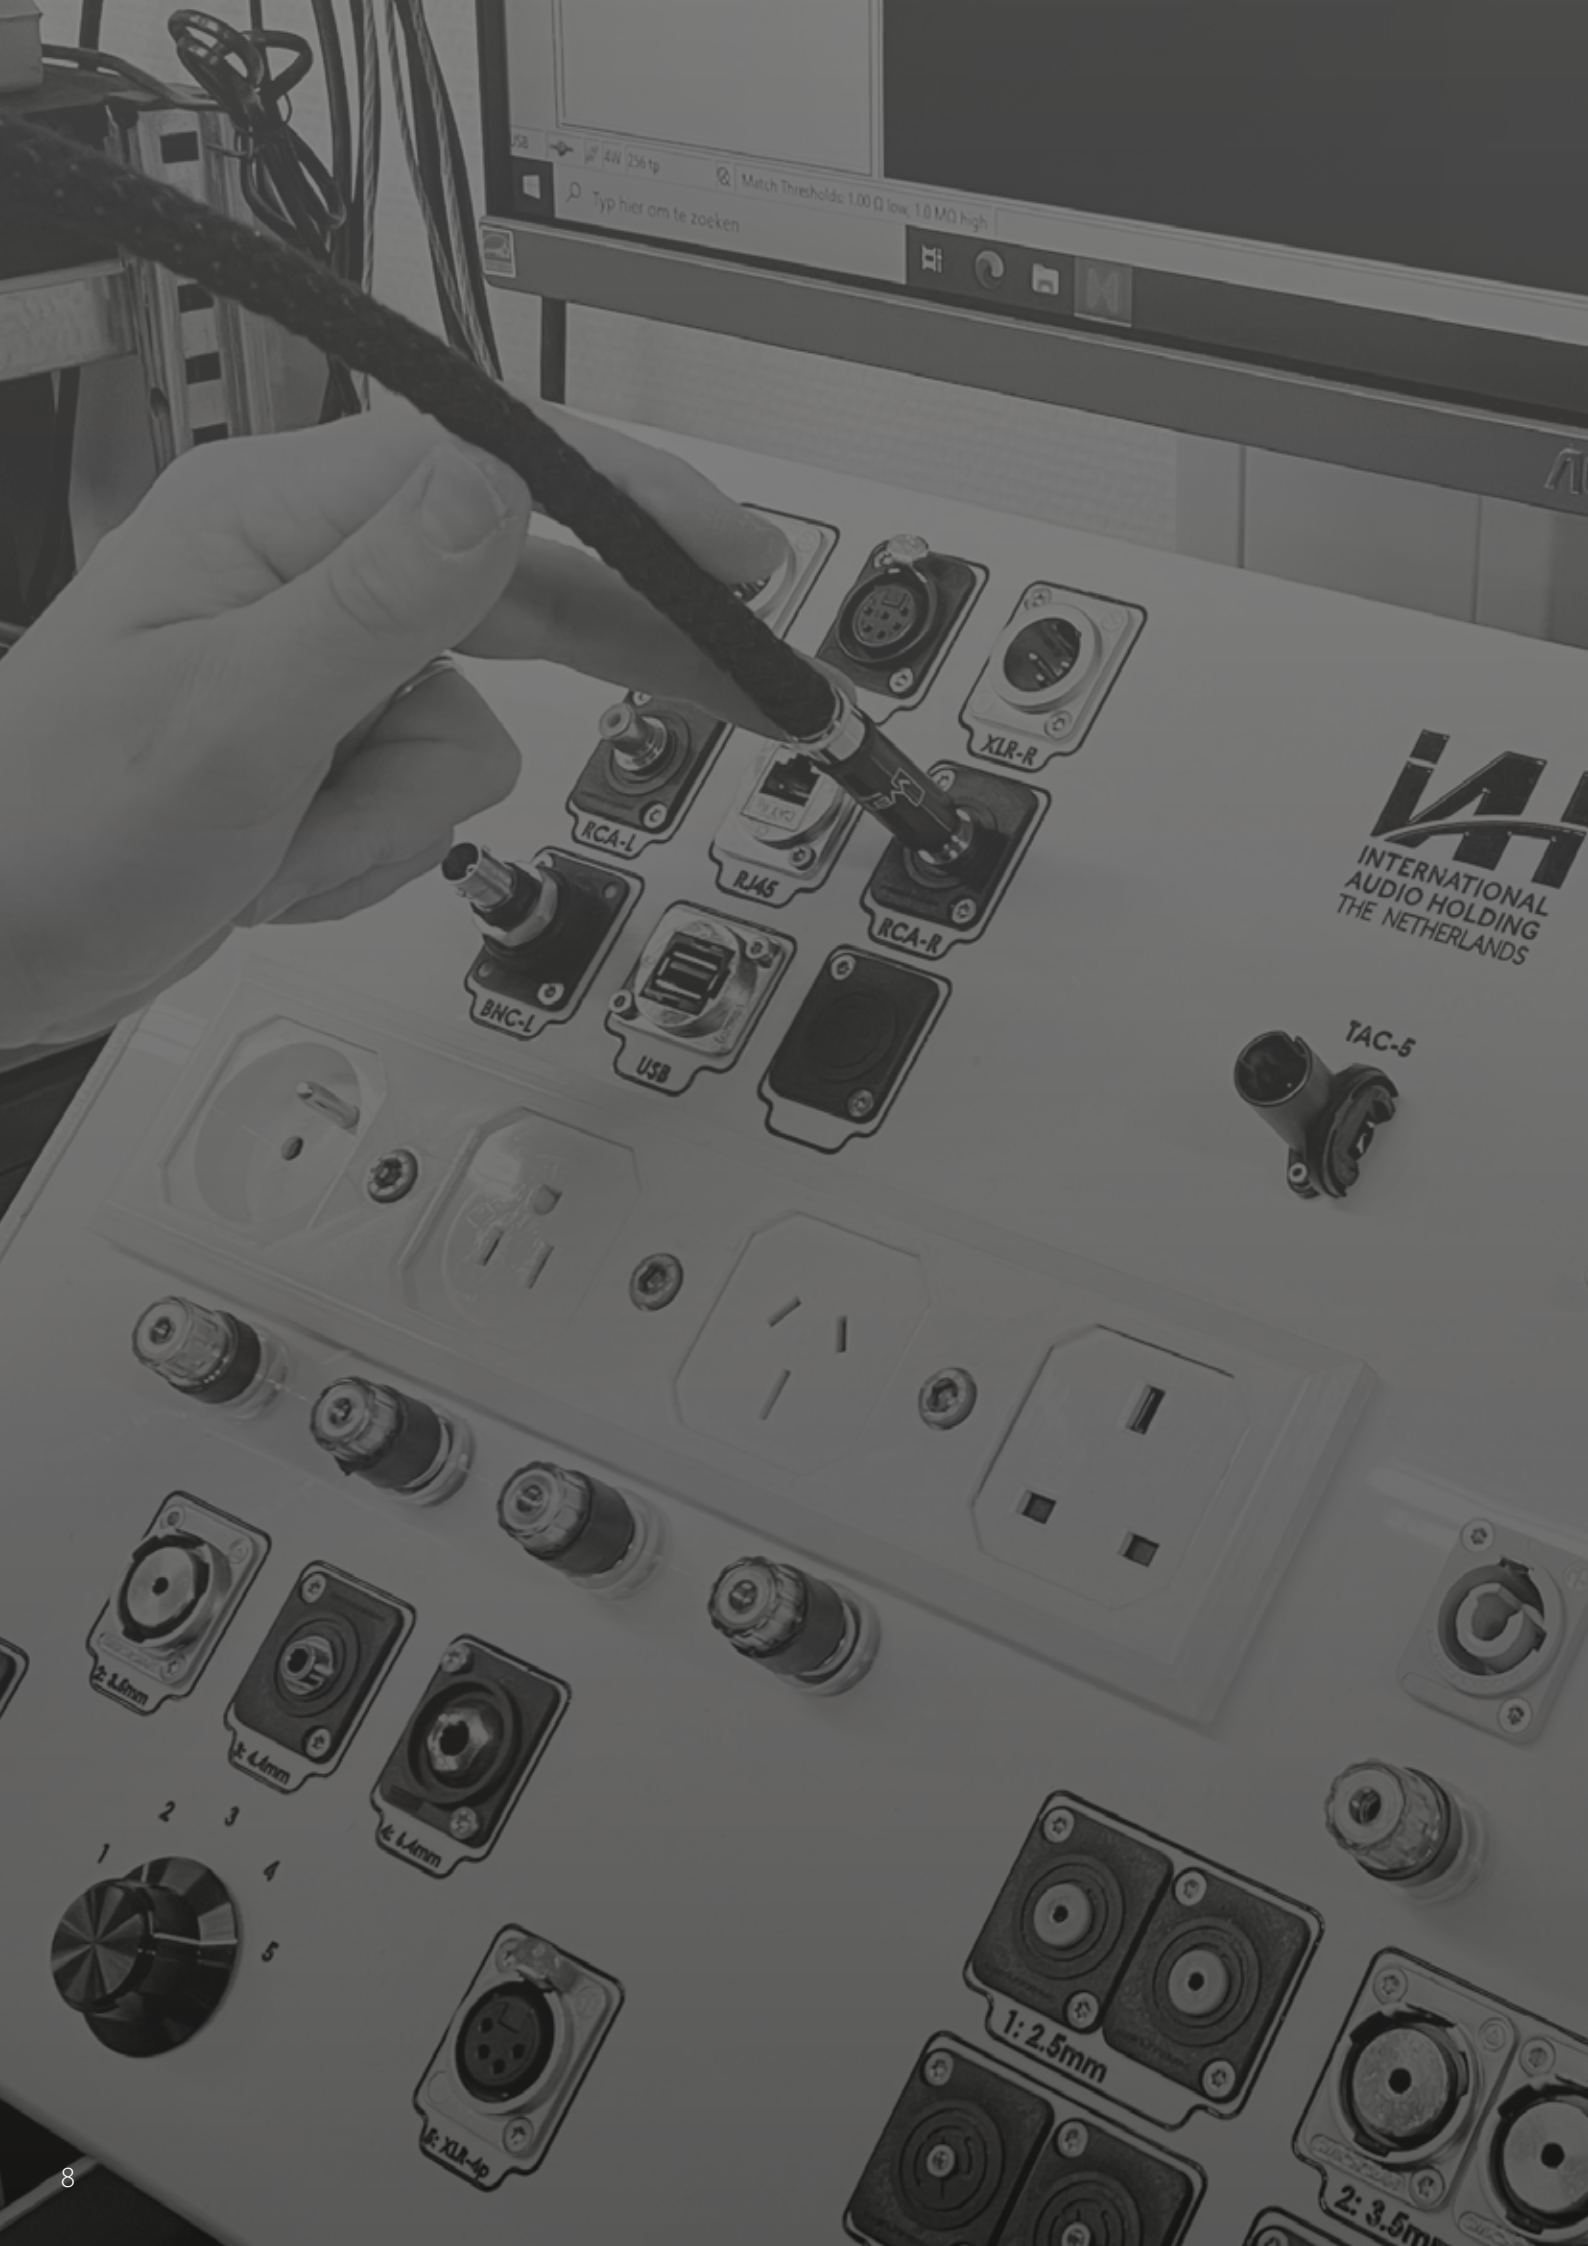

The Flagship, Perfected

The ultimate HMS product — designed without compromise. Built on the legacy of the Suprema series introduced in 2018, this line is not just a ‘mark 2’. Suprema MC2, using Monocrystal Copper throughout the entire line, bundles many technologies from the combined research of HMS and the new parent company IAH. A highly awarded flagship product, perfected further to create a supreme cable with unmatched musical realism. The XLR and speaker cables have built-in switches to optimize and tune the cable to your system.

- Supreme Monocrystal Copper conductor technology
- Multi-layer Teflon & Air dielectric construction
- Ultra-low capacitance and unmatched musical realism

Suprema is the endgame for any true reference-level system.

		Conductor	Insulation	Shields	Type
SUPREMA MC2	Power cable	Monocrystal Cu	Teflon Tape + PTFE Insulation	Carbon	8x Single Core
	Interconnect XLR/RCA	Monocrystal Cu	PTFE Tubes + Teflon + air	Carbon	2x Single Core + 1x Ground
	Phono	Monocrystal Cu	PTFE Tubes + air	Carbon	2x twisted pair Single Core
	Speaker cable	Monocrystal Cu	Teflon Tape + PTFE Insulation	no	12x Single Core

The power supply concept for all audio and video systems

HMS specializes in delivering the cleanest possible power to your system through the Energia power filters, using GLS (Ground Loop Suppression, for suppressing complex hum loops that may occur in systems) and DCS (Direct Current Suppression, allowing for more freedom and openness in the sound by suppressing distortion and hum from component's transformers) technologies and advanced combinations of materials like ferrite to passively filter power supply to your system.

The Energia power supply offering consists of several power filter devices to match every system's needs:

- **Energia MKII Basic:** The most basic version of passive power filtering using ferrite cores to clean up the power supply. Available with 3-9 output sockets.
- **Energia MKII GLS/DCS:** These power filters are enhanced with the proprietary GLS and DCS technologies for less distortion and a more open and authentic sound. Available with 3-9 output sockets.
- **Energia RC 1/1:** A front-end device with one output socket that can be placed in front of existing power distributors, cleaning up the sound through the GLS/DCS and ferrite technologies.
- **Energia RC 3/1:** The same Energia RC technology with GLS/DCS, ferrite core filtering and 3 output sockets. Integrated 1,5m power cord included.
- **Energia RC 4/3:** Top-of-the-line Energia RC with 4 output sockets, one optimized for power amplifiers and three for pre-amps, sources and other electronics.

With Energia power filter products, your system's sound image will become more focused, distortion will decrease dramatically, making your music sound more open and therefore a lot more authentic.

HMS Elektronik: Your Specialist for Cables and Line Filter Technology.
