

POWER

Audiodynamica Power key facts

- Can supply power to 3 separate BeCubes
- Low noise output with discrete regulators
- Large power transformer with multiple separate windings and screens
- IEC filtered input to minimize interferences from appliances

Details

Power

- Rated for 3 beCubes with plenty of reserve (phono, line and next future DAC/Stremmer)
- Oversized 50W power transformer with copper flux band and screen
- Military grade umbilical cords
- Separate regulators for main voltages, aux and digital
- Low output ripple and noise
- A separate chassis for power supplies guaranties a quieter operation of signal circuitry in BeCubes
- On/Off witch on BeCube Power only ... Other BeCubes dissipate very low heat and can stay on without issues
