schick Liebenthal tonearm

customer information

schick tonearms are available in three length variants.

	mounting distance
schick 9	229 mm
schick 10.5	270 mm
schick 12	305 mm

The schick 9 is a drop in replacement for EMT record players as well.

The tonearm includes a lift and arm rest with holding clip.  
All tonearms are equipped with an antiskating mechanism.

The arm has a 5 pin tonearm connector.  
It consists of a Teflon isolator and electronic test pins.

Else, you can choose a fixed tonearm cable, with lowest resistance and capacitance, symmetrical cable with schick RCA plugs.  
The cable is 1,1m long.

schick tonearms are available in three finishes to choose from:

gold

silver (nickel + palladium, matte finish)

black (black chrome, matte finish)
